

Beyond Memories

You came into my life
And made life so exciting
Brought me the love of a lifetime
And made things beautiful and shining

Skies are blue and smiling
Trees are green and whispering
Flowers are red and crying
Butterflies are colorful and spying
And birds are singing and dancing

Look into my eyes and see
How tears are running but smiling
Listen to my heart pounding
Fearful for a soul lost humming

You came into my life
And made me happy
Gave me memorable memories
And made life so exciting

I know it is time for you to go
Because life is short for true love
And love is too short for a full life
And we must keep marching

You know I must also go
Write and keep on writing
So memories can last
And keep on shining

Some are happy
Some are sad
But many are spoiled
And can never stop whining

When our grandchildren are grown
They will read our memories
Feel a touch of the old days
And say how enchanting

They will start wondering and asking
Stop complaining and whining
Smile, marvel, think deeply
And keep on hiking

The past is never past
When memories are written
They'll be relived by others
And keep on sparkling

Memories of love live forever
And are forever lasting
They entice others to read and write
And never stop enticing

O' memories, come back to me

I love your times

I love your eyes

You make me happy

More adventurous

But a little less wise
